Attorney Docket No. 98P7977

C1 and D

establish a connection to a group pickup destination to enable a caller station to be picked up from said destination, said destination being a user selectable location located on any group server anywhere within the network; and
a retrieval request unit to connect a call pickup station with said caller station;
wherein said group pickup system comprises a supplementary service group pickup system.

C2 D

9. (Twice Amended) A method for picking up a call in a group pickup system in a communication network having one or more servers, comprising the steps of:

Invoking the group pickup system;
establishing a connection to a group pickup destination to enable said caller to be parked at said destination, said destination being a user selectable group parking location located anywhere within the network; and
connecting a call pickup party with said parked caller;
wherein said group pickup system comprises a supplementary service group pickup system.

C3

12. (Twice Amended) A group pickup system in a communication network having one or more servers, comprising:

means for invoking the group pickup system;
means responsive to said invoking means for establishing a connection to a group pickup destination to enable said caller to be parked at said destination, said destination being a user selectable group parking location located anywhere within the network; and
means for connecting a call pickup party with said parked caller;
wherein said group pickup system comprises a supplementary service group pickup system.
